### Form of citation

Material in the Sudan Archive is given a reference number, which is unique across the collections of papers. Usually it is not necessary to give the name of the person or organisation within which collection the item is found, although it may be convenient to do so.

The short form of citation should be GB-0033-SAD.*reference number*

Most printed references take the form: SAD.*reference number* .

To order items in the searchroom, use the collection reference code(s), derived by removing the repository code (GB-0033-), followed by the reference number. Citing the section of the finding aid is useful.

## 1. Material relating to Barnett's PhD thesis.

This study drew heavily upon primary research including the survey of Gezira tenant farmers, Sudan Gezira Board (SGB) field staff, shopkeepers and general population around the village of Nueila, much of which has been preserved.

### a. Surveys and interviews

- SAD.354/5/1-73 1970 May  
Surveys of *samads* (agricultural supervisors). The survey questionnaire is largely personal and includes questions on family, employment history and finances. The surveys are written in Arabic (mostly transcribed into English on the reverse) and the survey results have not been anonymised.
- SAD.354/6/1-66 1970 Jul  
Surveys of Nueila village shopkeepers. The survey questionnaire is largely personal and includes questions on family, employment history and finances. The questions are divided into three categories: face data, career, and assets. The surveys are numbered 1-20. A typescript list of the questions asked is included at the front, whilst all of the survey responses have been handwritten. The file also includes a table linking each survey respondent with a map reference for their shop. The survey results have not been anonymised.
- SAD.354/7/1-106 1970 Aug-Sep  
Demographic surveys carried out on general members of the community in the village of Nueila. The survey questionnaire is fairly brief and includes questions on family, finances, and employment. A typescript list of the questions asked is included at the front whilst all of the survey responses have been handwritten. Many of the responses have been written in Arabic as well as English. File also contains handwritten notes concerning the results of the survey. The survey results have not been anonymised.
- SAD.354/8-357/2 1970 Dec  
Completed Gezira tenant farmer surveys conducted around the village of Nueila. The survey questionnaire is fairly extensive with questions on family, finances, employment history and aspirations. The questions are divided into ten sections: 1. Face data 2. Expenses 3. Income 4. Debt 5. Network 6. Family cycle 7. Work history 8. Tenants' Union 9. Aspirations and values 10. Status indices. The survey results have not been anonymised. The surveys are numbered 1-1062, though many appear to be missing.
